

ComplaintCore AI – Smart Customer Care Ecosystem

AI-Powered Intelligent Support Platform

Problem

Customer support teams are overwhelmed by repetitive Level-1 queries (refunds, order status), delaying critical issue resolution due to lack of intelligent automation.

Solution

ComplaintCore AI acts as an **AI-powered first line of defense**, instantly resolving common queries and escalating complex issues to human agents with full context.

Technical Architecture

Frontend:
React / Next.js
(premium UI)

Backend:
Node.js +
Express

AI Engine:
Google Gemini API
(classification +
severity detection)

Database:
Supabase
(PostgreSQL)

Realtime:
Socket.io

Core Features

- AI chatbot for instant responses
- Automated ticket generation
- Smart routing & severity detection
- Agent dashboard
- Real-time notifications
- Multi-language & voice-ready support

Business Value

Faster resolution (seconds vs minutes)

70–80% reduction

70-80% reduction in support workload

Scalable without increasing staff

24/7 intelligent customer support

Data-driven insights

Transforms customer support from a cost center into a scalable growth engine

Target Market

- E-commerce
- Food delivery & logistics
- SaaS companies
- Startups

Competitive Advantage

- AI + Ticketing unified system
- Smart severity detection
- Real-time escalation with full context
- Premium modern UI

ComplaintCore AI is a scalable intelligent support ecosystem that delivers faster, smarter, and more efficient customer experiences.
